

Recommended Ways to Tie Down Your GhostBlind Predator

This illustration shows several ways to tie down your GhostBlind in different wind conditions. You may wish to open up the blind more or less based on our hunting situation. Remember that the blind moving some in the wind will not reduce its effectiveness as everything is moving around the blind.

Notice the angle of the tie down strings in relation to the blind. You may need to adjust this based on the wind direction. Your blind may have either holes for the tie down strings, or V Shaped
