

What Do Customers Say About GhostBlind?

These are real customers, who have firsthand experience with our products, rather than pro staff or paid endorsements. Many of these testimonials were accompanied by pictures!

"Well....I couldn't wait around to win one...so I bought one. I was really skeptical about how the blind would perform. I hate to sound like an advertisement, but the blind was beyond expectations. I have never harvested a deer from the ground before...and I've tried.....pop-up blinds, ghillie suits.....you name it. Well....on opening day of shotgun in Illinois, I set up on a field edge, and was able to put 2 down. They never had a clue.... Thanks Ghostblind!" **Ryan Ortega posted on GhostBlind's Wall.**

"What a fantastic product!!! Set up almost anywhere in 5 min or less and be ready for the kill shot. Bagged a doe and a buck in the same week. Had other deer walking within 10 yards of me, they had no clue I was even there. Thank you. What an amazing piece of equipment. A real difference maker!!" **Mike Szymanski**

"Man the ghostblinds awesome! I just bought one and the very first sit in it i shot about a 150 lb doe. She had no clue i was there." **Kyle Lanier posted on GhostBlind's Wall**

"I'm not exactly sure about any of this, its for my husband & I've been hearing him talk about it to friends & caught him looking at this site MULTIPLE times=)" **Sent from an online customer**

"We had a 40 acre square wheat/bean field to hunt. We had 2 hunters in laydown blinds counter sank in the wheat outlined with decoys and we surrounded them on the surrounding tree line with 3 other groups of hunters. One of the hunters had an old fashioned nylon tent style ground blind, another used hay bails and I had the GhostBlind. My son Mitchell (white t-shirt) shot and dropped his first goose and I backed him up and got the other. The hunters in the hay and old fashioned ground blind did not get so lucky. Let me put it this way; the geese had 100% no clue we were sitting behind the GhostBlind. The trick was placing it just into the weeds on the field edge where it could grab the blowing taller grass in front of it." **Gary Stang**

"The ghostblind concept is the best cover tool since they put cinamon on toast! I won't bore you guys with a long drawn out story. I bumped several deer early one afternoon while walking out of the woods, one of which "appeared" to be a decent buck? I had hunted this area previously, and knew there had been a buck bedding near, but had never actually seen it. I decided to take a stab at these particular deer the next afternoon. I knew I had to get in quietly, and this meant no climber. Packing in the Ghostblind was the only option. I was in set up and hunting in about 5 minutes of arriving, undetected, I hoped? Within minutes of settling in, I noticed movement through the brush! It was a buck, a nice buck... then two, no three!! Three very nice mature bucks working there way towards me in single file! As I struggled to maintain my composure, I could hardly believe my luck, I was within 20 yds of three great bucks and they were 100% unaware that one of'em was bout to be target practice. I was actually able to watch them, completely undetected, and decide which of the three I wanted. At only 18 yds I was presented with "the shot of my lifetime"! God guided the arrow home. Ghostblind thank you guys so much for making 'Joe the hunter' feel like a sponsored tv hunter, even if for just one day. It's one I'll remember a long time. Thanks!" **Gene Stallworth**

"I have used my ghost blind bow hunting now for about a year and I have had deer, pig, quail and coyote within feet of me. Wait till you see how close these deer were to me. Thank you for coming up with this idea it really works!" **Dr Michael Scroggins**

What Do Customers Say About GhostBlind?

"I just got back from deer hunting in Texas and I used my ghostblind. When the boys came to pick me up at the end of the day, they were impressed in the fact they could not believe how the blind blended in with the surroundings. Looking forward to using it on a bear hunt in Canada in the spring. Many thanks for a great product. Just wish it was a little bigger. I hunt with a crossbow, because I am an old guy. " **Dick Miller**

"The Ghostblind has been used on and off for a year or so. It was used for the 2010 spring turkey hunt in Michigan. It was viewed as a great aid to camouflage the hunter from the super eyed turkey. A nice tom was taken from a bean field at 25 yards. The turkey never saw it coming. The latest test was the Michigan Deer Gun season in the same year. It was used both the first and second days of the hunt in mid-Michigan state land. The Ghostblind offers many advantages that were also noted from the turkey hunting earlier in the year. The biggest one is the ability to make small moves behind the panel without being seen. Getting something out of the backpack and checking the latest scores or playing a game of solitary on the Blackberry are just some of the movements that it concealed. Well maybe not the last two but you get the picture. The deer still seemed to think something was not right while looking at it but they were not spooked by it either. It also served to block out some of the wind that was blowing both days. The tie downs and stakes were very helpful in keeping the blind in position. Another advantage for the blind was it's portability in repositioning. After scouting the day before the opener, I found a hilltop that seemed to have most of the deer sign on the north side but when the deer showed up they were coming from the south. With a quick pulling of two stakes and picking up the light blind, I was ready for the deer from the south. Over all it was a good addition to hunting..... Over all I was pleased with the Ghostblind and will take it with me to the woods again. " **Wayne Gort**

"FIRST DAY USING BLIND, KILLED THIS 9 POINT IN LOUISIANA." DENNIS GOTREAU

"My name is Jackie Achee, from Baton Rouge, La. I bought a ghost blind on Nov. 19, 2010 and on my first day of use Nov. 21, 2010 @ 10:00 am I harvested a deer with my ghostblind. It was the most incredible experience in all my years of hunting. I am not a professional hunter or guide. My husband and I own a small parcel of land for only family use and I can attest to the fact that the deer did not see me. The wind was in my favor and this same deer came out on me 3 days prior and my movement caused the deer to flee. I am sorry I have no pics or video but this deer never saw me. I am convinced that the ghostblind allowed me to be invisible and my husband cannot stop raving about this product. I was 60 yds away and was able to raise my primitive weapon and make a much easier and more effective kill shot. My son-in-law helped us drag the deer to the truck and he could not find the ghostblind and we had to literally walk him up the hill and show him where I was sitting. He was completely awestruck. If hunters make sure that the wind is in their favor I am sure that you could hunt safer by not having to climb trees and not risk injury to many hunters. Naturally if the weather is bad I would go get in my box blind, but if we can continue to hunt successfully behind the blind we will have to get my husband a ghost blind also or we may fight over this great invention. LOL. Thank you also for your friendly phone service as you all are absolutely wonderful. I have to say that I thought the blind was a little overpriced, and some folks may not be able to purchase this amazing product, but to me it was well worth the price and we will probably purchase one more. We seldom purchase products we see on the hunting shows but if you are wondering where we saw your product advertised it was on one of the hunting shows. Cannot remember the name of the show. Thanks so much again. What a wonderful invention. Hats off to whoever thought of this. " **Jackie Achee**

What Do Customers Say About GhostBlind?

"I was hunting an oak grove that was being used heavily. The surrounding area was very thick and there was no way too set up except in the oaks. I knew I was way too close but didn't know what else to do. At 6:30P.M. a big doe fed into the area. She looked in my direction once and then began feeding again. I raised my longbow for the shot and she stopped to stare again. I thought for sure the gig was up, but she began feeding again. I continued my draw and her head went up again her ears went back and she began to walk away stiffly as I sent a two bladed magnus through her chest at less than 10 yds thanks to the ghostblind. P.S. My 10 y.o. got his first turkey in April using the ghost blind and my 9 y.o. got a doe with a shotgun during our youth season. I tell everyone I know how great these ghostblinds are."

Jerry Buschle, Rising Sun IN

"This blind has been very handy for me. I have used it for a week now. The first night I used it, I had a 6 point buck walk 5 feet from me. Needless to say, I was so shook up that I blew the shot with my longbow. It is hilarious when snowshoe hares get close enough to see themselves. They go nuts thinking there is another bunny there, and when I peek over the top and go "boo" they freak out. This blind has been alot of fun, and with an extremely low deer population up here, makes hunting fun because I don't have to sit every night in a tree stand or lug a heavy tent. I'm in my sixties and don't have to kill anymore to enjoy a hunt. I like to move around and see all kinds of wildlife. The ghostblind gives me that kind of flexibility. Thanks for a great product." **Robert Lord**

"Ghostblind is by far and away the best company I have ever worked with as a retailer. The product is everything that they claim it to be and the company truly drives sales into my store. Once I got my first shipment in and my contact information was posted on their website, I began getting more phone calls for this product than I have from any other wholesaler's website. When it comes to advertising, Ghostblind puts their money where their mouth is."

Joel E. Fulton, Freedom Firearms, 539 Capital Avenue SW, Battle Creek, MI

"This is my story. Friday 4-30 I set up the Ghostblind that I had borrowed from PJ on the edge of a freshly planted corn field. Was there about 30 minutes and saw a hen come out of the woods 15 yards away from me. Never even knew that I was there. She walked out in the field dusted off and kept on walking. Thirty minutes later I saw 5 jakes come out of the woods, in response to my calling, spotted my decoy, and headed straight down the hill for "her". They stopped about 50 yards away and all 5 gave the woods a thorough going over before continuing to the decoy. At 18 yards I shot taking the biggest of the 5. I laughed nearly out loud because the other 4 just stood there and seemed to be asking each other what just happened and not seeing any danger. After 10 more minutes they just strolled away. I spent the next 2 hours just laughing to myself about how good the Ghostblind is. I still chuckle about it. Thanks for the great product. I am looking forward to using it for deer season with the same results. Thanks "

Wayne Gort

"Today was opening of Turkey season I used the ghostblind for the frist time I set up in an open field with the sun shinning right on the blind and harvested a long beard The turkeys never were bothered by the sun reflection I will be getting another Blind soon. Thanks for a great product."

Raymond Pursell

"It was an early morning in the south part of Scotts Bluff County Nebraska, started out at 0600. We set up the GhostBlind as seen in the pictures with the wind to our left. Began calling at about 0700 and with in just a few minutes we had 3 coyotes coming into us on a dead run. They approached and clearly had no clue we were there, unfortunately my shooting skills this morning with the adrenalin rush had diminished, but 3 shots later we had a coyote! We have had the blind out many times now, and have learned that the most important thing to remember

What Do Customers Say About GhostBlind?

is not to break your horizon, make sure what ever your blind is reflecting, is the same as your backdrop as you can see in the picture. This will for sure give you success more times than none. My buddies are in the process of ordering their blinds, and soon we will have a great collaboration of hunting with 360 degrees of GhostBlind around us! That's my 2 cents!"

Jordan Meininger

"It was a bow kill and I did not find him until 2 days later in a swamp. Bobcats and Coyotes got him good unfortunately. I have killed 3 behind it and plan on doing more of the same. I will take it to West TX in April for turkey hunting and Hog hunting. Never thought about pics but will do in future. Great product. I love it and gives me a break from the climber stand. Both my boys bow hunt and use it often since they are too young to use a climber. I will send pic of skull mount from Jan 1. Big ugly bruiser at 25 yards. Best new deer hunting product I have seen in 40 years of bow hunting." **Best, Chris Collins Richmond, VA.**

"I just thought I would share with you my first kill using the ghost blind. This deer is 8 or 9 years old. I have watched him for 4 years now. Taking him with a gun was not an option for me. I love getting close to them. He was too smart to get in close. I must say the ghost blind did the trick. I set up in the brush just off the edge of a field. Before he showed up, I had about 12 other deer within bow range. Some of those deer were within 12 feet of me and never new I was there. Around 5 p.m. this buck came out into the field and spotted all of the deer around me and felt it was safe to come in. It went down perfectly. He came and all the other bucks and does parted and let him get within 20 yards of me. I made the shot and he fell no more than 40 yards away in the field. Thanks for a great product!" **Regards, D. Paul Wagnon**

"I had numerous deer several times within 10 yards of my ghost blind without knowing anyone was home. They all munched comfortably and securely assured there was no danger lurking nearby. That was the last mistake for this unlucky buck." **Harry Gemberling, Silver Spring MD**

"I just wanted to let you know I appreciated all your efforts to get my Ghostblind shipped to me on time for my recent hunt in Kentucky. I live in Florida and was leaving for a Kentucky bowhunt prior to the projected UPS arrival date. With some help from a young lady at your company (who's name escapes me), my blind was re-routed to a friend's place in Kentucky- making it before I did. I put the blind to the test a couple days later and bagged a nice Bluegrass 8 point. I got the wind right and he never saw the arrow coming! I have attached a picture to share OUR success. You make a great product and you obviously have a great staff. Keep up the good work and I'll keep spreading the word about the effectiveness of your blinds. Thanks again!"
Jeff Dixon

"Nice Indiana buck taken on the first day of firearms season from my brand new Ghostblind. He never knew I was there. Great product." **Bob Pellegrino**

"Thank you Ghost Blind and Reba!! 23 yards and he never new I was there. Hunted a scrape and ghost blind did the rest. The four-panel model is light enough for this 66 yr. Old with the stool and it set up just like you advertised. Its my best buck with the bow and I cant wait for shotgun and Muzzle loader. Great product and I can wear the old woolies and not worry about camo. Just think how much is spent on camo when the ghost blind does it all. Thanks again,"
Phil Roderick, Bliss,NY

What Do Customers Say About GhostBlind?

"There was something odd about the nice 12 point buck . I saw it last year and it seemed to have an odd gait . The binoculars revealed the deer had deformed hoofs. this year,I decided to hunt this deer or a nice 10 point which would score even higher than the 12 . November 15 was warm and windy,not what i wanted to see.At 3:00,the does started moving so i moved to quickly set up my Ghostblind on a frequently used trail.The 12 point buck came by at 35 yards but no clear shot..After he passed,a small 8 point came thru and the 12 point came back towards me to show he was the boss. At 4;30 he gave me a broadside shot at 30 yards and i made a good hit with my crossbow. The Ghostblind is really great for its lightweight design and becoming whatever shape or color is in front of you.I attached the Manscape to the xbows frame and it took away the hard shape allowing me to an extra layer of camo behind the Ghostblind.Well,its off to the taxidermist!" **Roger Pettit**

"BA took one down last night at TCO with his mighty Limbsaver. This is all the info I have at this time. Here is an early shot of his kill. We'll have better pics and details later. Roy Danker took a nice one in Kansas Saturday night, too! We have him at 158 5/8. I've attached his pic as well. Thank you, GhostBlind! Couldn't have harvested this buck without your product! BVO has had a great week!" **Buck Ventures Outdoors TV**

"Hi Greg, Forrest Carter from Carter releases here... So far I had a couple opprotunities at bear but one was too small at 20 yards... Full draw on him and everything, just let him live. The next was at 9 yards but we locked eyes and he busted me. never saw the blind, just my eyeballs staring him down. The success so far is this Idaho doe I took a few nights ago. 44 yards with 2 smaller bucks and 2 other does with her. Perfect top of the heart shot. The blind works like a charm as advertised, you truly simply... disappear. Thanks again for making such an adaptive product. My focus is now on another nice buck I have patterened on the farm and elk up north from us. I would be honored if you can use the picture. After season ends and I hopefully have a couple more Kills I have an idea for an article regarding the ghostblind." Thanks, **Forrest Carter**

"Attached are some more pictures. Thanks again for a great product. I think I sold two of them for sure today at work just telling my turkey story from the weekend and I plan on buying the deluxe bag to carry it with before the bow season. I'm a believer for sure and I keep spreading the word! Picture 454 I sent in a text to all of my friend after I set the blind up. I walked right past it the first time I went to sit for the evening and nobody that saw the picture could find the blind until they zoomed the picture in really close. One friend even said- "it's to the left of the big tree- right" - nope it's to the right but thanks for playing! Picture 355 was another set-up I did. The birds never came close to the edges of the field so I set-up right in the middle and got one right out in the open field like I was invisible! Again- thanks for a great product. Now I have to hang it back on the wall until September and I'll surely send some more pics. Thanks," **Brian Woller**

"First of all, why didn't I think of this? The Runner is amazing! The reflection is crystal clear. The product is lightweight and easy to carry. I love it! Fits right in the back of my turkey vest and sets up in seconds. Had one turkey this season that was roasted closer than I thought and I had to sit down right where I was. Without my blind I would have stood out like a sore thumb. I shot the turkey, went to get him, looked back at my set up and was amazed. I totally could not even see the blind. It blended flawlessly!" **HappyGhost – product review, Cabela's Site**

What Do Customers Say About GhostBlind?

"I recently purchased a six-panel runner ghost blind for my pre-season deer scouting. I have a heart condition that limits me to ground blind hunting so I decided to give the ghost blind a try. By using normal hunting tactics such as wind direction, natural cover and scent cover I was able to get within 10 yards of many animals, deer, fox, and even a coyote without detection. I cannot wait for hunting season to begin so I can score with my new blind. Great idea! Thank you ghost blind, mr.jim," **JimFromJersey – product review from Cabela's site**

"Hunting from a wheelchair I have used a lot of ground blinds. Problem with the ground blinds are I'm not able to setup myself or move around if I wanted to hunt a different spot day of the hunt. With the ghostblind I'm able to setup the blind myself and if I need to move I'm able to transport the blind myself. I have harvest turkey and deer with the ghostblind. Ghostblind to me is priceless... Thanks for a great product!!!" **OhioWheelChair – product review from Cabela's site**

"After reading some reviews I was nervous about my purchase...but I LOVE IT! The lightweight panels have held up great! After hunting for both a turkey season and a deer season my Ghost Blind still disappears! I've beat it up pretty hard in the woods and it still works great. One tip though...make sure you remove the protective film it comes shipped with! I love my GhostBlind and definitely have better success because of it!" **HappyGhost – product review, Cabela's Site**

"This is the whip. It really is the perfect blind. If you are looking at retiring your climbing tree stand this is the way to go. A see through roof top would be great for rainy days. Customer service is also great. They are willing and ready to serve. I used this blind in turkey season and was never seen by turkeys, dogs, people or deer. It is also a great option when there are no trees large enough to get into. Thanks for a great product." **Raego – product review from Cabela's site**

"Set up super easy. Virtually disappears. First day using was super windy and it held up great when staked down correctly. Had several deer in easy bow range clueless to my presence. Happy I own it." **Timbertall – product review from Cabela's site**

"I just took over our 3,000 acre Family Hunting Ranch to Book Hunters on Deer, Turkey, Hogs. I had no idea what I was to use in the form of Blinds? The elevated Box Blinds are popular, as the Tree Stands, but my liabilities and concerns took over and Ghostblind won by 40 lengths! That is alot considering Secretariat won the Belmont by 36 lengths. Back to the GhostBlinds, I set one up the other day in between the water tank and deer feeder. I was closer to the deer traveling the trail than I have ever been! Plus, they did not even look my way, about 22 yards away. I am blown away, and will report again after my first Bowhunters will set up my Ghostblinds Oct. 1st, and if they can shoot at all, will tag out within the first few days. Everything is on GO with my ghostblinds and thanks for carrying such a unique item for the Wildlife Hunter! I can't think of any Game that could not be bagged using this unique invention!!!" **SnakeyBendOutfitters – product review from Cabela's site**

"This is a great product! I have used it both Turkey hunting and deer hunting and have had animals walk right up to it. They never spooked. The turkeys walked up to it while they were feeding, they got so close I lost sight of them. The deer got well within bow range. This product works very well running and gunning/bow hunting. Well worth the investment." **Wws101 – product review from Cabela's site**

What Do Customers Say About GhostBlind?

"I have hunted for the past two years out of a Ghosblind while ground hunting and have taken some true wall hangers from behind one. They are super easy to setup and light as anything out there. As for the gentleman listed below that talked about the "cloudy" look, he obviously didn't read the instructions and remove the film on the blind for shipping. I can't wait to arrow another giant from behind my Ghostblind this fall!" **GABuckman – product review from Cabela's site**

"I have been hunting whitetail for forty years and missed some opportunities on some nice bucks because I couldn't get close enough, no trees to climb, traditional ground blinds didn't blend in with the natural surroundings. Ghostblind was the answer to my prayers. Although I didnt get Wally wall hanger last season I was able to get up close and personal and fill a tag or two. The Ghostblind is another tool in my toolbox . Great product well constructed and comfortable to carry." **FishOn60 – product review from Cabela's site**

"I've used this product to harvest whitetail and turkeys this past season. I've killed deer it in one area of my property that is pretty much open and was never able to kill anything there until i bought the ghost blind. I couldnt be happier with this products quailty and effectiveness. Just like anything else you are spending your money on if you take care of it it should take care of you!! Bottom line its puts meat on the table!!" **NeverHome07 – product review from Cabela's site**

"I purchased the ghostblind after being sold watching the pictures and videos about this product. Once it arrived i couldn't belive the quality for the amount i spent, it was just made out of actual plastic cardboard with a reflective panel glued on. The plastic cardboard pannels are their answer to making it lightweight. I still gave it the benifit of the doubt and tried it out on the field. I don't know why but the mirror panels are not crystal clear like a mirror reflection; they look so fogged up and cloudy. It stands out in the field due to the poor quality of the reflection, I was so disapointed after spending so much. I just recently took it out again only to find the mirror panels have now formed spots. I tried cleaning and wiping them off but no luck, its been stored indoors all this time in a controled tempatured enviroment and it has only been out in the field once for about 10 minutes. I should've just invested in a high quality ground blind for the amount of money i had spend on this." **TxHunterTx – product review from Cabela's site**

(This hunter obviously never removed the protective film from the mirrors.)

"I just want you to know how excited I was when I received my Man Stalker for my bow. I have been busted by deer so many times after the leaves fall from the trees, I really think this is a great solution to that problem. Thank you for a cool product and great service, I received my order in 2 days." **Andy Prince**

"Words cannot adequately express my appreciation for the great customer service that you personally provided me when I stopped in completely unannounced to see about getting a longer piece wire for one of my extensions...I have been hunting for 51 years now and have learned that it pays to get the best gear that you can afford and to do business with people who provide superior customer support... You and your company fill both those dimensions. Based upon my own experiences I would rate your service right up there with Weatherby, Leupold, Summit, Millenimum, Swarovski, and Lehigh Bullets... each of you make great products and back them 100% and always place the customer first!

Thanks once again for a great product, superior customer support and putting your personal touch into the arena. I will wear my hat and display my decal on my hunting vehicle to show support for your company in the hopes that others will give your products a try...We sportsmen and sportswomen need good American made products backed by good people, it makes the whole outdoor experience more satisfying". **Mike Simpson, Newburg, PA**
